2.1. Sign up (continued) 5
3. Profile 6
3.1. Profile (continued) 7
4. Create an event 8
5. Homepage 9

1. Log in

The log in page.

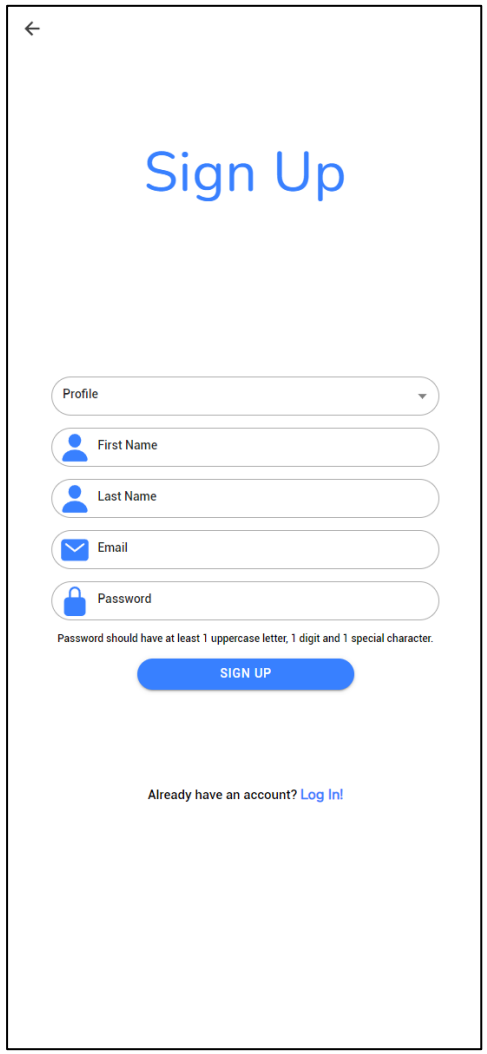

A user isn't found.

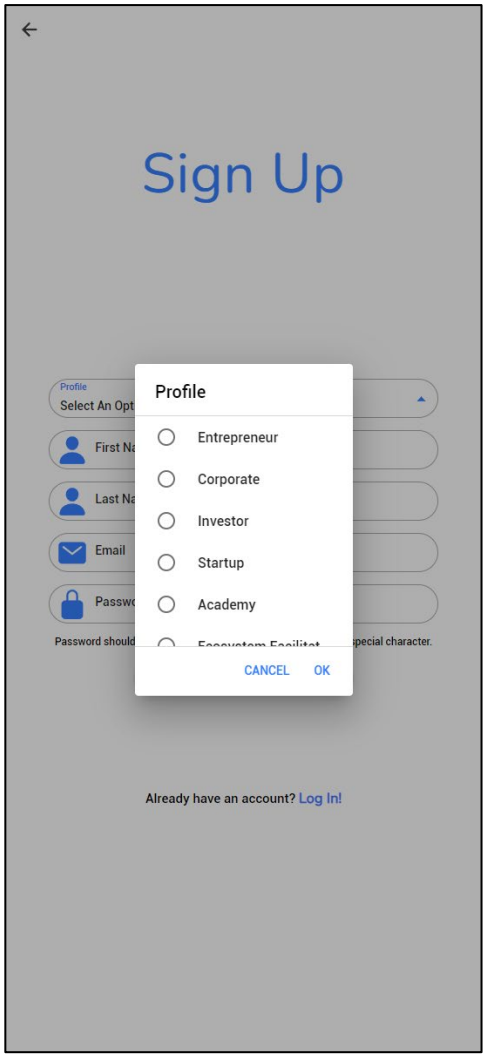

US4: As an event attendee, I want to be able to log back into the app if logged out, so that I can access and use the platform anywhere.

This is the log in page where users can log in. The case in the second image shows where a user has inputted incorrect information in which the system shows the user isn't found.

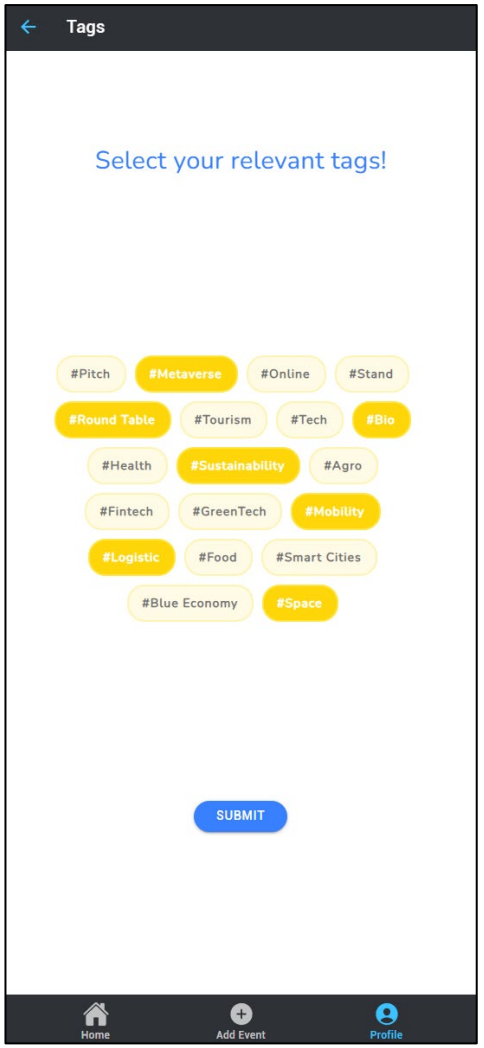

2. Sign up

The sign-up page.

Profile selection.

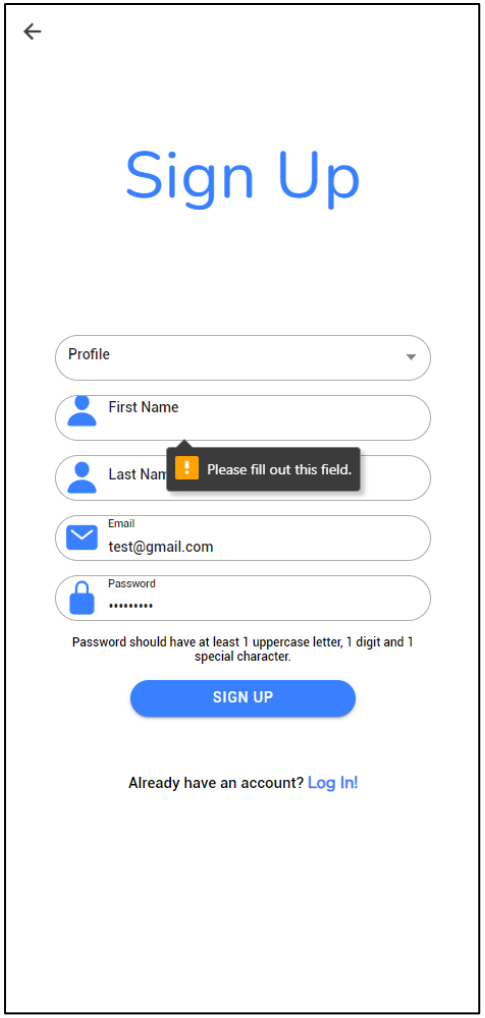

Tags are able to be selected.

US3: As an event attendee, I want to be able to sign up to the app, so that I can start viewing potential events I can attend.

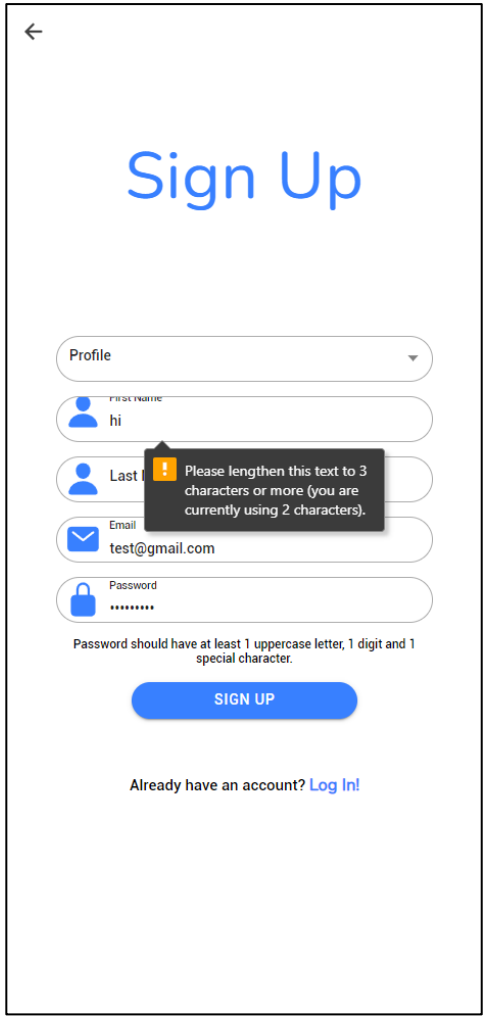

US1: As an event attendee, I want to provide my preferences of events when I register my account, so that I am provided with events that's relevant to my chosen preference.

This is the sign-up page where users can sign up. The case in the second image shown is when a user wants to select the profile that fits them to sign up. The case in the third image shows when a user wants to select the tags that are relevant to them so relevant events get served to them.

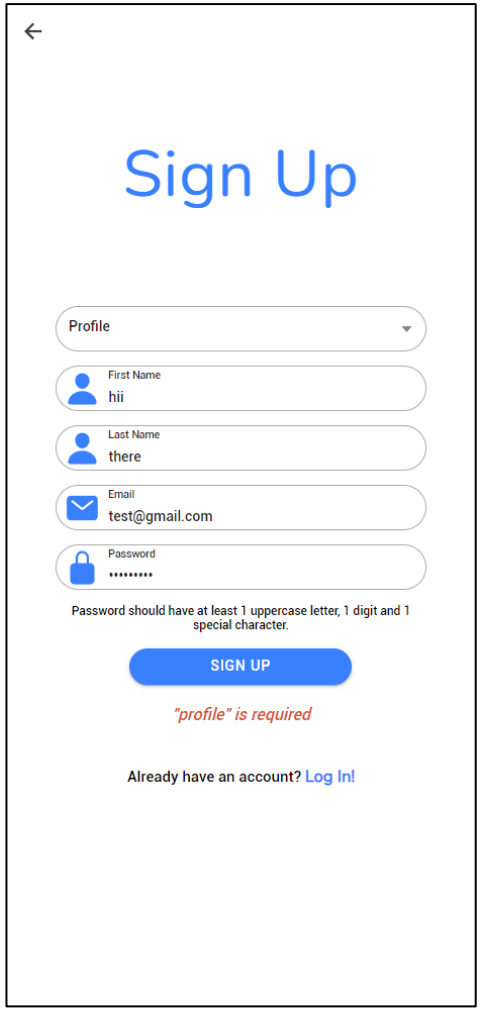

2.1. Sign up (continued)

A field hasn’t been filled.

The text in a field isn’t long enough.

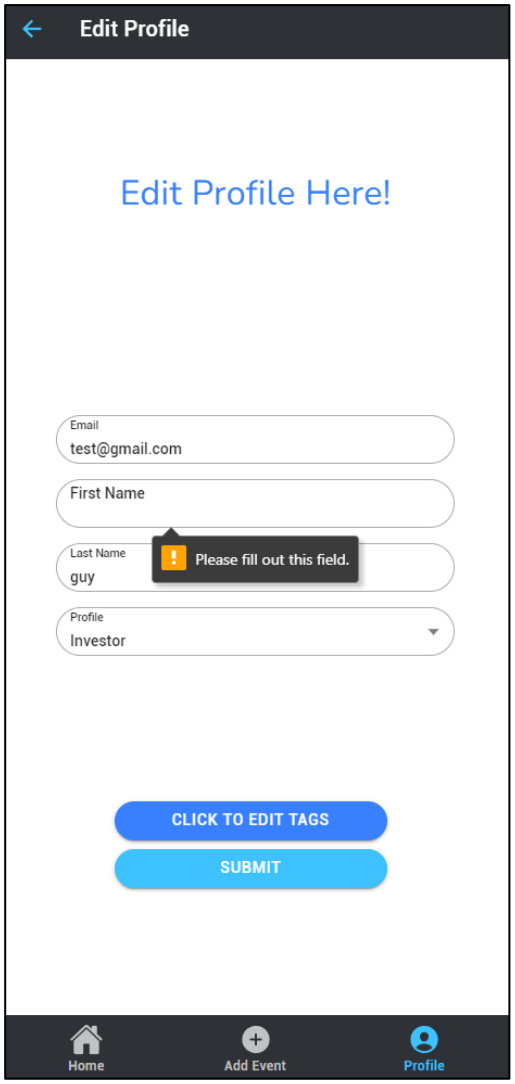

A profile hasn’t been selected.

The case in the first image considers a situation where an error appears from a field without any input in it. The case in the second image considers a situation where text isn’t long enough within a text field. The case in the third image considers a situation where a user hasn’t selected a profile, and an error is displayed.

3. Profile

The profile page.

A field hasn't been filled.

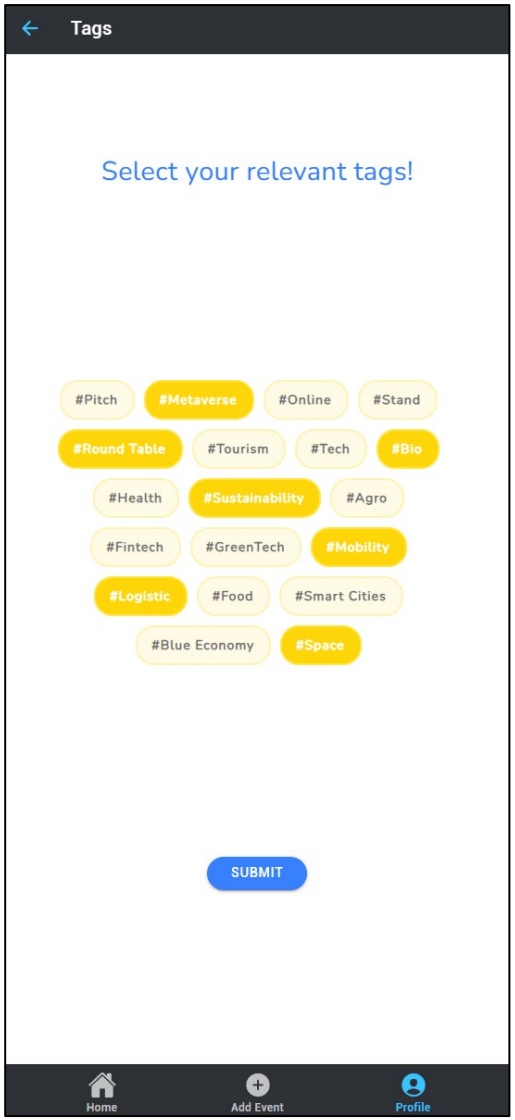

The text in a field isn't long enough.

US15: As an event attendee, I want to be able to edit my profile information, so that I can display accurate information about me.

This is the profile page that contains a user's information. The case in the second image considers a situation where an error appears from a field without any input in it. The case in the third image considers a situation where text isn't long enough within a text field.

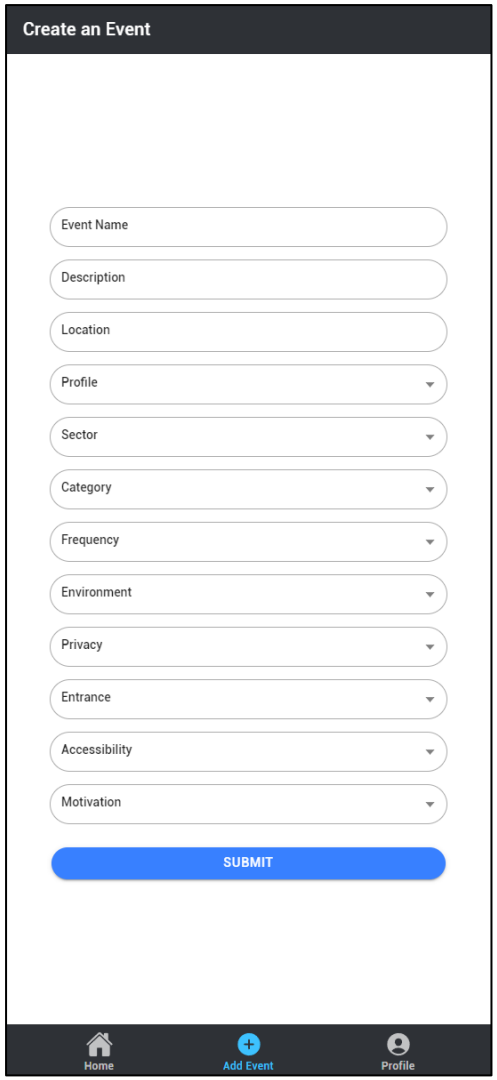

3.1. Profile (continued)

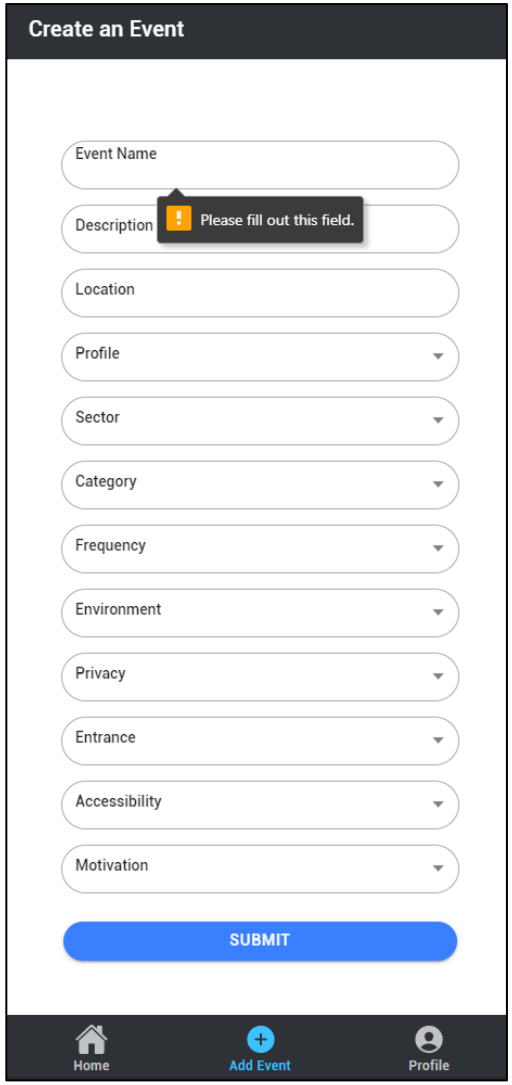

Tags are able to be updated.

Similarly to the sign up path, users are able to edit their tags.

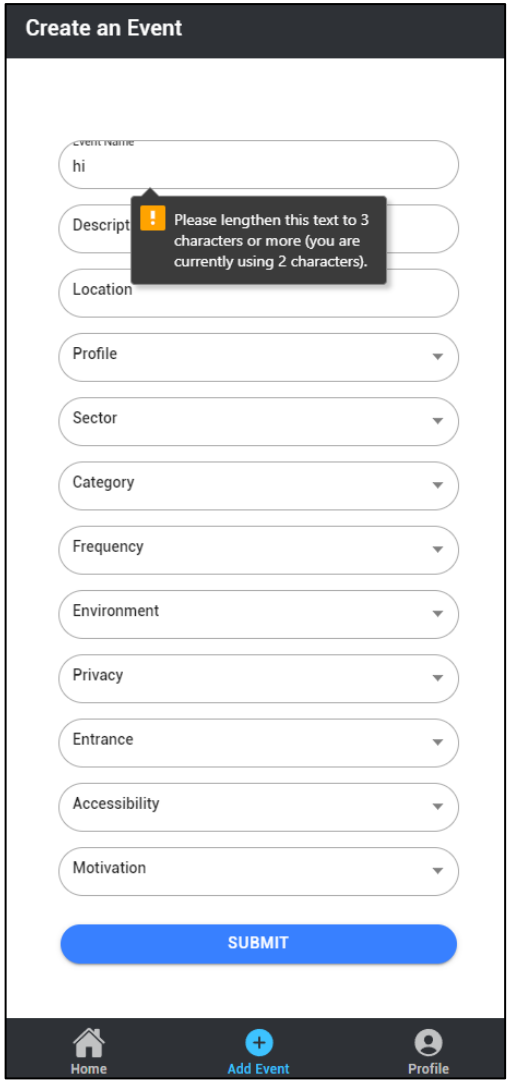

4. Create an event

The event creation page.

A field hasn't been filled.

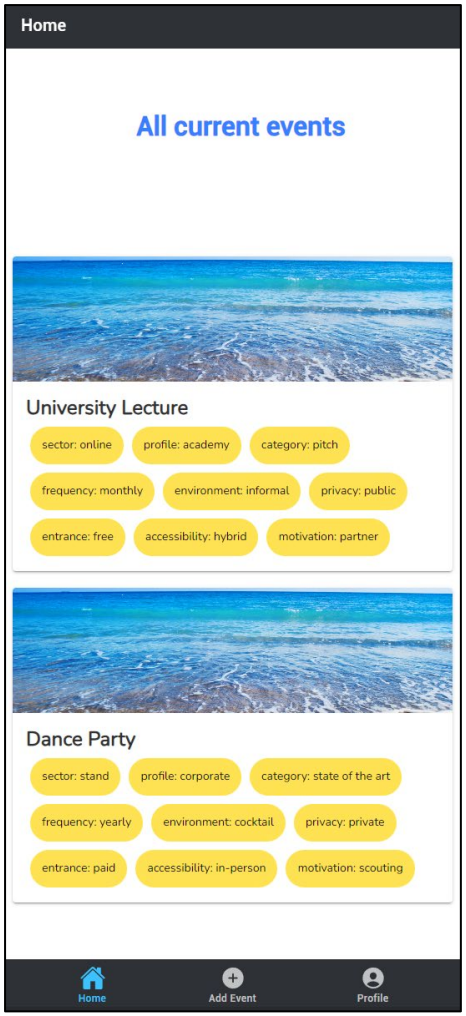

The text in a field isn't long enough.

US8: As an event host, I want to post my upcoming event on the platform, so that I can increase the turnout for the event.

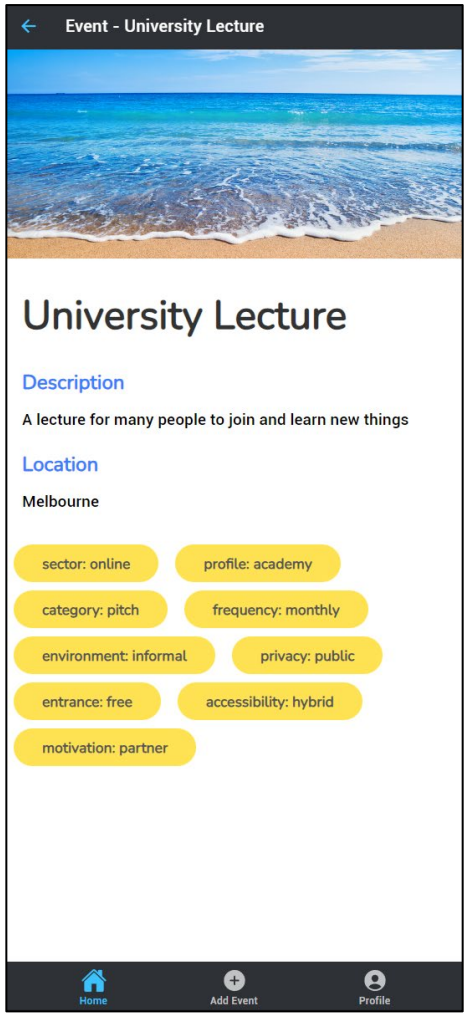

US12: As an event host, I want to be able to select tags, so that I can accurately categorise my event to ensure interested attendees are made aware of it.

This is the event creation page in which event hosts can add an event to the homepage. The case in the second image considers a situation where an error appears from a field without any input in it. The case in the third image considers a situation where text isn't long enough within a text field.

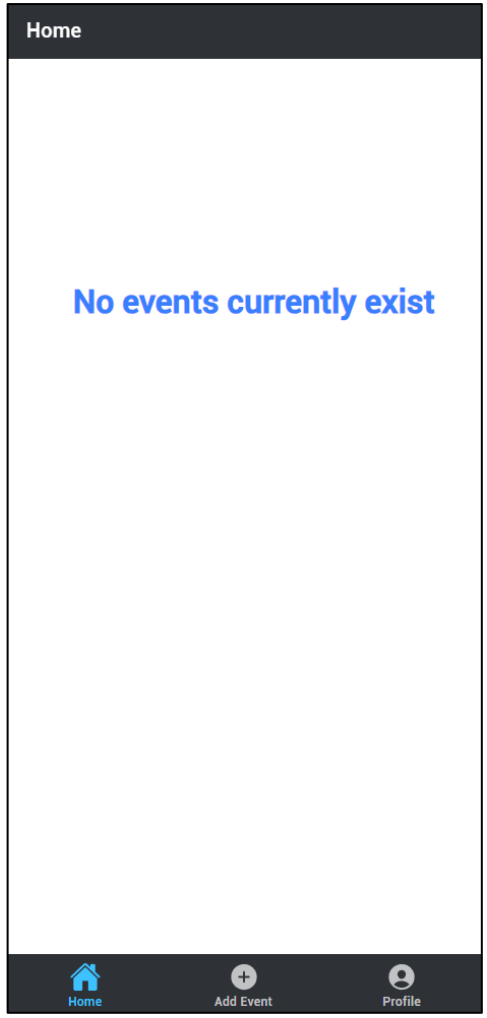

5. Homepage

The homepage.

The event info page.

No events existing.

US16: As an event attendee, I want to tap on an event on the homepage to reveal more information about it, so that I am able to understand if the event is relevant and interests me.

This is the homepage where a user will see all the events posted and the information located on each event. The case in the third image considers a situation where there are no current events that exist to show to users.
